Wildflowers

Stained Glass Coloring Book

John Green

Dover Publications, Inc.

PUBLISHER'S NOTE

Simply put, wildflowers are flowers that grow without human cultivation. Some, however, can be introduced into gardens, and some flowers found in the wild are actually garden flowers that have "escaped." Of widely different shapes, sizes and colors, wildflowers brighten the countryside from early spring to late fall. The sixteen wildflowers pictured here, all from North America, are printed on special translucent paper, which will produce an effect similar to that of stained glass when colored and hung in a window.

These pictures can be colored with crayon, felt-tip pen, acrylics, watercolors, tempera or even oil paint. You will get interesting results if you mix these coloring methods. You can color one side or both; using different colors on the two sides will produce rich combinations. If you color one side only, place the sheet on your window with the colored side facing outdoors to produce a crisper black outline.

The plates are all identified, in the order in which they appear, on the inside back cover.

Wildflowers

Stained Glass Coloring Book

John Green

Bring the natural beauty of wildflowers indoors with this delightful collection of ready-to-color stained glass illustrations. Sixteen familiar, accurately rendered wildflowers—all identified—are waiting to be brought to life with a rainbow of colors from the artist's palette.

Here are dainty buttercups, vivacious New England asters, a magnificent trumpet vine and showy lady's slipper, a stately jack-in-the-pulpit, water lily and feathery goldenrod, an exotic columbine and eight other species.

Boldly outlined on translucent paper, these lovely illustrations need only be colored with paints, felt-tip pens or other media and then placed near a window or other light source to produce dazzling stained glass effects.

Original Dover (1996) publication. 16 full-page designs printed on translucent paper. 8½ × 11. Paperbound.
